

DIAGNOSTICS AND MONITORING EDUCATIONAL PROGRAM

Medtronic

VIRTUAL MULTIDISCIPLINARY SYNCOPES EDUCATIONAL PROGRAM 20TH OF JANUARY 2021

Putting Guidelines Into Practice: The focus of the program is to educate a multidisciplinary group of clinicians on **practical strategies to simplify and improve syncope diagnosis.**

Objectives: Through a combination of presentations from syncope experts/guideline co-writers and interactive workshops, we will provide guidance on how to:

- Develop an effective syncope diagnosis care pathway
- Form a syncope multidisciplinary team
- Obtain buy-in and support to increase access to syncope diagnostic resources in the hospital
- Implement effective Reveal LINQ protocols (implant through to follow-up)
- COVID19: drive efficiency with remote monitoring and Reveal LINQ out-of-lab

We will explore James Cook University Hospital Blackout Clinic (Syncope Unit) that has been in place for more than 10 years and understand the work of this multidisciplinary syncope outpatient clinic.

Syncope Reference Center Background

James Cook University Hospital (Middlesbrough, UK)

The faculty from James Cook University Hospital manages a **multidisciplinary syncope outpatient clinic** that involves cardiology, neurology, emergency medicine, and a robust nursing team. They have implemented multiple strategies to streamline the referral pathway throughout the hospital. By collaborating within the hospital and tracking results, they have successfully improved multiple facets of syncope diagnosis for their patients. During this educational meeting, the team will share their experiences and journey in implementing this effective program.

Meeting Agenda

THURSDAY, 20TH OF JANUARY 2021

Expert presentations followed by workshop sessions

Moderator: Ivo Salgueirinho, Medtronic

Developing & Implementing a Syncope Pathway Workshop material

CENTRAL EUROPEAN TIME (GMT+1)

Topic Area	Presentations	Presenter	Time
Program Overview	Welcome – Program Introduction & Overview	Ivo Salgueirinho Medtronic	14:00 – 14:05
Syncope Diagnosis: Why and How to Address the Problem?	Syncope Challenge & ESC Syncope Guidelines: What has changed and how has it impacted clinical practice?	TBC	14:05 – 14:20
	Managing Syncope Patients: Which Specialties to Engage and How?	TBC	14:25 – 14:40
	Emergency Medicine Perspective: Guidelines & Simplified Tools to Improve Syncope Risk Stratification	TBC	14:45 – 15:00
Workshop 1	- Analyzing current Challenges & Barriers with Syncope Care at your hospital - Syncope Stakeholders and Referrals	Discussions & Brainstorming	15:05 – 16:00
BREAK 10'			
Syncope Unit & ICM Service	Syncope Pathway & Multidisciplinary Approach: - Making the Case to Implement a Syncope Service - James Cook Pathway Analysis	TBC	16:10 – 16:25
	Syncope Clinical Cases: - Syncope Patient Management and Testing - Following James Cook Clinical Pathway	TBC	16:30 – 16:45
	Setting up an ICM Implant and Follow-up Service: - Engaging Nurses - Leveraging Remote Monitoring	TBC	16:50 – 17:05
Workshop 2	- Syncope Pathway overall steps - Syncope Patient Selection – Stratification - Patient Selection for ICMs	Discussions & Brainstorming	17:10 – 17:55
Closing	Closing Comments & Adjourn	Ivo Salgueirinho Medtronic	17:55 – 18:00
